

How to Run the Gmail Prioritizer Agent

1. Clone the repository:

```
git clone https://github.com/YOUR-USERNAME/gmail-prioritizer-agent.git  
cd gmail-prioritizer-agent
```

2. Create a virtual environment:

```
python -m venv .venv  
.venv\Scripts\activate
```

3. Install dependencies:

```
pip install -r requirements.txt
```

4. Create Google credentials:

- Go to Google Cloud Console
- Enable Gmail API
- Create OAuth Client ID (Desktop App)
- Download credentials.json and place it in the project folder

5. Create config file:

```
copy config.example.json config.json
```

Edit config.json and add your Gmail address.

6. Run dry test:

```
python gmail_prioritizer.py --dry-run
```

7. Run live:

```
python gmail_prioritizer.py
```

Important:

Do NOT upload credentials.json, token.json, or config.json to GitHub.
